

STRATEGIC LEADERSHIP:

*Out of the
Rough*

Full Program Itinerary
Two-Course High School Program

FOUNDATION WORK

September 8-12: We start our academics with a one-week intense Online Live session where you will meet, virtually, with your instructors and classmates daily. The Foundation Work for the English course consists of reading and discussing assigned novels and short stories, while the leadership course will get your heart pumping and prepare you for our golf sessions and rigorous adventures. Students have access to the Google Classroom, where reading lists and Foundation Work assignments are posted.

MUSKOKA

September 14-18: Our adventure begins in Muskoka, the scenic wonderland of the near-north. Clublinks' Rocky Crest and Lake Joseph courses have become legendary for their majestic beauty and top-rated facilities. Our morning routine combines a full-body workout and golf lessons to get your game up to par. Each morning you will be given a leadership case study to discuss during the round of golf. Each foursome will present their solutions during our afternoon debrief sessions guided by local business leaders who provide insights from their field of expertise. Afternoon English classes allow for group discussions of novel studies and biographical stories of business and sports leaders. Each of these courses offers its challenges, and students will improve on the golf course and in the classroom. Our final day in Muskoka culminates in a Stableford golf competition and a presentation of the students' best creative writing pieces.

MONTREAL

September 18-26: From Muskoka, we travel out of province to Montreal, where students reside in a french-infused city rich in music, fashion, and unique cuisine. Students balance their time on the course with discovering historic neighbourhoods like the Mile-End, the Plateau, and McGill University. Our daily leadership activities delve into the biographies of top athletes and global leaders that inspire and share their insights. After golf rounds and English tasks, students rejuvenate during free afternoons enjoying some of the best activities in the region, biking through boroughs that range from bohemian to Gothic revival, to climbing the famous Mont Royal. After a week in Montreal, we will discover why it is a top choice on 'Cities I've Got to Visit' lists.

MONT-TREMBLANT

September 26–October 2: Our next location is Mont-Tremblant, to play Le Val de Lac and Le Maître du Mont—two world-class facilities of extraordinary charm. When we're not golfing, we take advantage of the beautiful landscape and explore the region with long hikes and bike trails. Academically, we focus on improving formal writing skills and crafting exceptional pieces of writing that will have the students standing out from the rest. On our final day in Mont-Tremblant, we participate in one more golf tournament that incorporates leadership skills, friendly competition, and low golf scores!

QUEBEC CITY

October 2–8: We conclude our program with a stay in historic Quebec City. It is here where we take a step back in time and visit Old Quebec, a UNESCO world heritage site since 1985. We walk the cobblestone streets and admire the European architecture and world-famous Château Frontenac as we dine like locals and try out our rusty French skills on some unsuspecting locals! We wrap the course with a final tournament, where students pull together the skills they have learned from their many lessons and competitive rounds of golf. Quebec City is also where students utilize the masterclasses, guest lectures, presentations, and personal experiences to showcase their English writing and presenting abilities. Our closing banquet and awards night makes our final evening in Quebec City genuinely memorable and a wonderful finish to a once-in-a-lifetime experience.

ONLINE LIVE

October 13–16 and 19–23: After our time together, students have eight days to complete your final cumulative projects and prepare for your online presentations and discussions with your teacher. At this time teachers will be holding online discussions and personal guidance to ensure you craft the best presentations possible.

FINAL EVALUATION WEEK

October 26–30: During this week your teachers will schedule a time for one-one-one presentations and discussions using Zoom. You will also complete an online, interactive examination to demonstrate your level of understanding and skill level for each course. MEI students and teachers have found this style of evaluation not only enjoyable, but the most authentic and thorough method to demonstrate what you have learned and experienced during the term.
